**DNA GENETICS**

DNA Genetics is a seed company that was founded by Don and Aaron in Amsterdam back in 2004 and is known for being one of the undisputed leaders in quality medical cannabis genetics. In just over a decade DNA has won more than 200 awards in all categories at the most prestigious cannabis events throughout the world.

Quality and variety are a trademark that you can often find within the DNA Genetics brand. Some of our most famous strains are the L.A. Confidential, Chocolope, Holy Grail Kush, 24K Gold and Lemon Skunk.

Crockett Family Farms is a 3rd generation family run farm. They are committed to working hard to create quality reliable genetics and superior medicine for patients as well as connoisseurs.

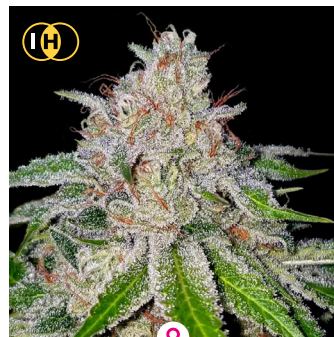

Our flagship strain is Tangie. With over 20 awards it is one of the most recognized and sought after strains in the world. Along with our DNA family, we have created a new line of some very unique strains. We have meticulously tested them indoors and outdoors to assure we have only the most stable and superior genetics on offer. We have brought you an array of game changing genetics that will surely be a great addition to any garden.

# Most Awarded Cannabis Brand

DNA Genetics, one of the most prominent seed companies in the world, has been at the forefront of the global cannabis industry and culture for over a decade.

One of the most interesting characteristics that has always given DNA a competitive advantage in the industry is its insight into the cannabis culture through its deep rooted ties to California.

DNA has a seed shop that has been open in Amsterdam for over ten years and through this portal, has been able to bridge the gap with what has been some of the most sought after strains in the world, many of them with southern Californian origins.

DNA was the first international seed company to take the widely popular OG Kush and provide it in seed form to the masses. DNA also created the first pure Indica to be genome sequenced and genetically mapped in the world.

Over the years DNA has strived to push the boundaries on developing new genetics as well as application to the medical community and charitable organizations. DNA has worked with various non-profits organisations such as The Unconventional Foundation for Autism.

Source your winners with DNA Genetics cannabis seeds today.

**IMPORTANT DISCLAIMER:** Under the single convention on Narcotic Drugs act of 1961, Vienna, the import, possession and commerce of hemp seeds is not subjected to international oversight. However in some countries, possession, commerce and germination of hemp seeds is illegal. Therefore, we advise you to inquire about these regulations that you are subjected. As a customer you are required to comply with the following conditions: You are prohibited from distributing our cannabis seeds to countries where possession of and/or trafficking in cannabis seeds is illegal, for example United States of America, Australia parts of Asia, Norway or any other countries where traffic of Cannabis Seeds is considered illicit. DNA Genetics hemp seeds are sold and distributed under the condition that they will not be used for any purpose other than those specified in local laws. DNA Genetics hemp seeds are Adult (Over 18 Years) collectable souvenirs and help to preserve the genetics for future generations. The illegality of Cannabis Seeds has caused a major reduction of its gene pool, leading to a high-risk extinction of strains.
